

SensorPresion::procesarLectura

SensorTemperatura::  
procesarLectura

ListaSensor::head

```
graph LR; A[SensorPresion::procesarLectura] --> C[ListaSensor::head]; B[SensorTemperatura::procesarLectura] --> C;
```

The diagram illustrates a data flow where two sensor processing methods, `SensorPresion::procesarLectura` and `SensorTemperatura::procesarLectura`, both point to a common destination, `ListaSensor::head`. The source boxes are white with black borders, while the destination box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
